CITY OF BANGOR. A CRAND

The immense success attending our great benefit and last year ha-ingurate another grand sole to continue two weeks. We propose this time to college if former efforts of our own or any one class. With that object in view we have re-sulty bought largely of many kinds of staple goods at prices never them of the for-id we shall give our patrons the full benefit of our low purchases. We call your at-ntion to the following prices which we shall canke on a few specialties for two weeks also.

gain. L balo good sard while brown cottons 5 cents per jard. 13-4 by the

piece.

1 bale Heavy I irm Sheeting, 61-2 cents.

1 bale Very Best Sheeting made 7 cents.

1 case Good Bleached Sheeting, 6 cents

1 case Nice Vine Bleached Sheeting, 8 mme thing we have been selling for 10 cents only 71-2 cents.

1 case Finite of the Leons. It case Fruit of the Loom, 8 cents per yard. I case more of those Pacific Chambrays, the best goods in theworld

1 case more of those Facine channels, 5 with the price, 10 cents, for the price, 10 cents, 100 Ladies Waterproof Circulars, sizes 50 to 62, only 92 cents, warrant over garment and guarantee they are the same thing we have been selling for \$1.50.

Job lot of 52 inch Ladies' cloths, all colors, warranted all wool only

the above are only a few specialties. We never half a good a stock as we have la spring and everything is cheap. You spring hoslers, and gloves. Elegant now thing shales in Diess to dood all kinds. Everything will be found exactly as reponted. The iso citi and dynamics for yourselves and remember these prices continuals two week plant me, tricily for each. We cannot the regional adulties price. Measures for lessening direct attacks by be divided into two classes—preventes and remedies. The preventives which reget most general use in the orchical and remedies for lessening direct and remedies for lessening direct and remedies for lessening them to rather the orchical. It is, there fore, highly decessing that the orchical direction, reget most general use in the orchical and remedies for insect degree active active.

Goed entiture and tidiness. Good station is the first and most rigorous and made upon the orichardist for the contion of insect rayages, as well as for matching thrift lu his trees. Tidines in consist of the specific copecitie light matching thrift lu his trees. Tidines in o prompt removal of all rubblsh and lit- blue light. and clean cultivation, are cheer and har relation to the ventilating of ped-ormat preventives of laser, depredations. Hor de Mann used to that, the stace the straightful was farty miles deep illing moth, carcullo, flat-headed borer, all around the globe, it was a u-cless ego k louse and numerous other insects in a only orthand. Weak trees are especial orites of certain insects, especially the states of certain insects, especially the headed borer and the bark loase. The quent turning and stirring of the ground strops the liding places of insects, and poses the larve to bards and weather. same turning and stiring me the us of adding fresh eiger to the tree-A continuous cropping of high 55 Is a early always highly detrinquiat an orchard, especially on poor inad-casual observer can easily demon-

to litmost the greater average abuna of insects in long-solded a chards n thuse which are always cultivated. Cashing the trunks and main branchtrees with some and water and carto acld, as a preventive of egg-laying corers and other luseets. The earlylle ip wash, made by bolling together one art of soft some and two gallons of er, and adding a pint of grade earbolic I wildle the mixture is still not, is probthe best wash to be land. The odor he calbolic acld remains for a long

and it is very disagreeable to inserts goed wash is also unide by adding to the to mixture a little sulphur. Washes trees are chiefly of benefit in preventthe attacks of insects, or in destroying eggs, or in killing such insects as bark Is necessary for this purpose. I have been able to ascertain any better refrom whitewashing their from soapshing trees, although I buye son I approving that some lajury results in whitewashing. It is certainly unventise or a remedy, although it i conformed in the former capacity. Englicing trees with firehly timed

her some similar preparation to pre-title asserts of the carker worm and Plantlag should which will attract is from fruit trees, and from which they be easily captured. It is been found a some of the wild and cultivated spi-

virture. The quality of the commer- $\left| \cdot \right|_{1}^{24}$ Eding is so, variable, that, the positive, capartlets gamest be given. An readlin-July 1- all that is commonly regulard, esyringe is filled will; the polsonous o, by drawing back the piston while nozzle is immersed, and then by a dy push the liquid may be thrown over lightest tree. A movile with one circuopening throws the Hauld in one uncan stream causing a great loss, while real nozzle with many minute holes not allow the liquid to pass out with defeat force to pass over a tree. The st cheap syrings which I have ever used a about 20% feet long, with a borrel or its lies in displeter, the upper end bemade of cooper and panetared with mercus holes an eighth of ah high hadis neters. Some of the numerous fountain apa which are now manufactured are h superfor to the average. They on a continuous stream with little ef-.. For throwing liquid over hoge or-ad frees. Prof. Lintur shall a flat whether the transfer is the find the street of the treet is the street of th one time. Parls, green is insoluble in der, and the liquid containing it must be "en stirred to keep the particles in sus-

daxis green can be used to destroy neardl leaf-sting insects which work upon one before the full is built lipe. It is most effective of all reactiles legalast casher worm. It is also a good remay for the first brood of the codiling moth who or apple worms. When the apples are first formed they stard upright on their stems. The moth lays her eggs on the upper or "blow end" of the little apide. Parts green which is syringed over destrors the larve when they begin to feed. Later the apples turn downwards and the rains wash, away the holson. Lon-don purple is cheaper than Paris green, and but be used in much the same man-

2. Keroscop all is attracting much attention as an insecticity. It is a deadly poison to nearly all insects while it is harmless to man. As it does not mix with water, an emulsion should be made with milk. An emulsion composed of one-third oil and two-thirds milk, either sweet or sour, la found to be most serviceable. This canulation may be applied in the same Lianner as Paris green.

3. Jarring off certain insects on to

sheets spread upon the ground. This is the best method of destroying the plum ad peach corcullo, and it is effective in

the habits of baseet oremies, this principle may be greatly extended.

5. Applying the soap wash for the pure 10. 70 STATE bark lice scale insects etc. ose of alling The scale inspets may be destroyed by a sorp solution which is injected on to the

7. Killing borers with a twig or a wil or mitting them out with a knife, 8. Bureley infected twigs, as in the case of the high borer, twig memory etc.

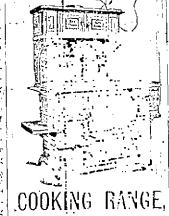

9. Attracting high-rying insects to the sor strong light-rying insects to these or strong lights in the oreheat.
